**Online Education and Training
for Medical Transcription and Medical Coding**

[O]pportunities [A]bound with [K]nowledge

FLEXIBLE AND CHALLENGING HEALTHCARE PROFESSIONS

Why a healthcare career? Medical transcription and medical coding are professions searching for qualified people. They provide an opportunity to work from home or work onsite for an employer.

Job opportunities exist in many areas such as medical transcription service companies, hospitals, physician offices, multi-specialty medical practices, radiology offices, medical billing companies, insurance companies, legal offices, etc. The healthcare environment is exploding in growth and opportunities for the person with a quality, "real world" education. It is important to identify what fits your interest. Do you like to continuously learn and grow? Do you like to type or are you good at research and finding the most appropriate result to the documentation you are reviewing? Do you like to work from home or do you prefer to be in an office setting? Do you want to help patients, but the thought of injecting them with needles, emptying bed pans, taking urine samples, cleaning wounds, etc. stop you from joining the healthcare team? If so then entering into a professional career as a Medical Transcriptionist and Medical Coding Specialists may be for you!

Tracy C. wanted to make some changes in her life and researched the career in medical transcription. Shortly after her enrollment in the course she discovered she had cancer. She was able to get through the chemo treatments and continue the course because she could do it from her home. Tracy says, *"It's exciting to see where I was, what I have been through, and to see where I am now. I am cancer free and have a job that I really enjoy!"*

**"She was able . . .
Because she could
do it from home"**

Melissa L., a new Mom with a desire to stay home when her baby arrived, planned to accomplish that goal by taking this online course. She completed it in approximately 9 months, all from home!! As Melissa said, *"I could take the training over the Internet in the evening from home while I maintained a full time job during the day."*

**"Be with the baby
and work from home."**

WHY A HEALTHCARE CAREER?

- **You will be an important part of the healthcare team**
- **You can work from home or in other professional settings**
